Fatal Accidents in Trade and Logistics Industries

VISION ZERO 
Safety.Health.Wellbeing.

To build a strong prevention culture and to eliminate accidents at work and occupational diseases, the ISSA's "Vision Zero" concept is a transformational approach that integrates the three dimensions of safety, health and well-being at all levels of work. The ISSA has developed a range of resources to support the implementation of the Vision Zero Campaign in enterprises by following the seven golden rules www.visionzero.global.

Fatal Accidents in Trade and Logistics Industries

The German Statutory Social Accident Insurance Institution for the Trade and Logistics Industries (BGHW) systematically evaluated the fatal work accidents in the period from 2012 to mid-2019 in Germany. Essentially, the 315 fatal work accidents that occurred in this period can be divided into six focal points.

The combined data led to additional findings on fatal work accidents. The results of these evaluations are summarised in sketches. The aim of this collection of sketches is to share the knowledge about fatal

accidents in trade and goods logistics for information, sensitization and instruction of employees as well as for the (further) development of operational measures to prevent such accidents at work.

This publication is a contribution to an international exchange of knowledge and to the global VISION ZERO strategy.

ISSA

The International Social Security Association (ISSA) was founded in 1927 under the auspices of the International Labour Organization in Geneva, and today has over 320 member institutions from over 160 countries. The ISSA is the world's leading international organization for excellence in social security for

- social security institutions,
- government departments and
- agencies.

The ISSA offers a global platform and a unique network for all those in social security concerned with the health of workers. The ISSA aims to promote dynamic social security as the social dimension in a globalising world by supporting excellence in social security administration. ISSA promotes excellence in social security administration, e.g. through professional guidelines, expert knowledge, research, services and support to enable its members to develop dynamic social security systems and policy throughout the world (<https://www.issa.int>).
